

OFFICE OF ENTERPRISE TECHNOLOGY SERVICES

P.O. BOX 119, HONOLULU, HAWAI'I 96810-0119 Ph: (808) 586-6000 | Fax: (808) 586-1922 ETS.HAWAII.GOV

April 15, 2020

The Honorable Ronald D. Kouchi,
President, and
Members of The Senate
Thirtieth State Legislature
Hawaii State Capitol, Room 409
Honolulu, Hawaii 96813

The Honorable Scott K. Saiki, Speaker, and Members of The House of Representatives Thirtieth State Legislature Hawaii State Capitol, Room 431 Honolulu, Hawaii 96813

Dear President Kouchi, Speaker Saiki, and Members of the Legislature:

Pursuant to HRS section 27-43.6, which requires the Chief Information Officer to submit applicable independent verification and validation reports to the Legislature within ten days of receiving the report, please find attached the report the Office of Enterprise Technology Services received for the State of Hawaii Department of Human Services' Systems Modernization Project.

In accordance with HRS section 93-16, this report may be viewed electronically at http://ets.hawaii.gov (see "Reports").

Sincerely,

Douglas Murdock Chief Information Officer State of Hawai'i

Attachment (2)

Hawaii Department of Human Services Systems Modernization Project

Final IV&V Status Report for Reporting Period: March 1-31, 2020

Submitted: April 15, 2020

Overview

- Executive Summary
- IV&V Findings and Recommendations
- IV&V Engagement Status
- Appendices
 - A IV&V Criticality Ratings
 - B Risk Identification Report
 - C Acronyms and Glossary
 - D Background Information

Executive Summary

In March, DHS and ASI leadership and staff demonstrated agility and flexibility by rapidly adopting the Federal and State guidelines related to the COVID-19 pandemic, meaning project work continued via remote access methods. The project team's focus was two-fold – developing the BES Optimization contract amendment, and performing activities related to conversion, functional and technical designs, and testing.

IV&V reviewed aspects of the draft BES Optimization contract amendment and provided comments to DHS for consideration. Based on our initial review, IV&V will focus on researching four keys areas once the BES Optimization Contract Amendment is final:

- 1. Staffing Proficiency of ASI's staff implementing/using the proposed tools, software and process changes.
- **2. Requirements** Assurance that the solution meets Federal (FNS, CMS) requirements and provides traceability from initial requirements definition through production implementation.
- 3. Architecture ASI's ability to fully integrate proposed tools and software to new and existing project tools (e.g., ALM).
- 4. Subcontractors ASI's management and oversight of subcontractors, with clearly defined roles and responsibilities as well as project guidelines for managing project artifacts.
- When the BES Optimization contract amendment documents are final, IV&V will continue to work with DHS and the ASI to explore each of the above areas to identify potential risks and mitigation strategies for the project.

IV&V continued to participate in project status meetings and review project deliverables. As communicated in the February IV&V Monthly Status Report, all findings and categories now include ratings.

There are eight open findings in the Project Management category, one finding was retired (CMS MEET Certification Process) and two new findings were added; CMS Outcomes-Based Certification and COVID-19. The majority of the findings are rated as medium, the BES Architecture and the new COVID-19 findings are the only findings in this category with high criticality ratings at this time.	Project Management	W	A/N	A/N
V&V Observations	Category	Mar	Lep	ายม

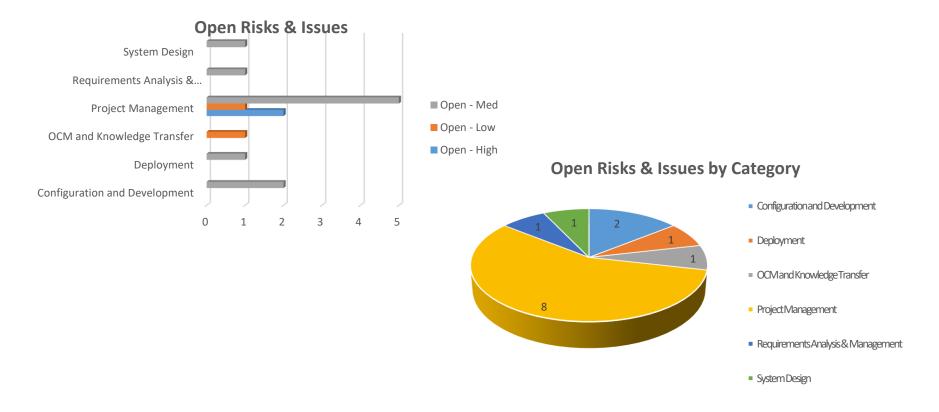

Executive Summary

Jan	Feb	Mar	Category	IV&V Observations	
N/R	N/R	M	Configuration and Development	One of the two open findings is related to the MQD Portal, for which DHS indicated the RFP was released in this reporting period. The second finding is related to the project teams lack of a shared understanding of the ASI DDI approach.	
N/R	N/R	M	System Design	The only open finding in the System Design category is related to the planned sequencing of discussion(s) about Workflow at the end of JADs instead of during the JAD sessions for each of the functional areas.	
N/R	N/R	N/R Deployment The only open finding in the Deployment category is related to the planning and approach of the DDI Release Management practices. Based on discussions with the ASI, it is anticipated that some DDI release changes will be made as the project gets closer to the next BES release.			
N/R	N/R	M	Requirements Analysis & Management	In March, the project team continued to 'break down' the project's functional requirement eliminate the instance of 'partially met' requirements within design deliverables. IV&V will keep this finding open until the go forward path for all BES requirements is defined by the project team and will provide an update in April.	
-	- N/R OCM & managing their staff transition plan and the ASI has hired additional staff to include the project coordinator position that allowed for a transition period and is currently recruiting the vacant solution architect key staff position. Considering the COVID-19 Pandemic,		DHS and the ASI made good progress to address this finding in March. DHS is actively managing their staff transition plan and the ASI has hired additional staff to include the project coordinator position that allowed for a transition period and is currently recruiting for the vacant solution architect key staff position. Considering the COVID-19 Pandemic, there could be economic impacts to the state directly related to the project resources needs in the short and long term.		
N/R =	No crit	icality r	ating provided		

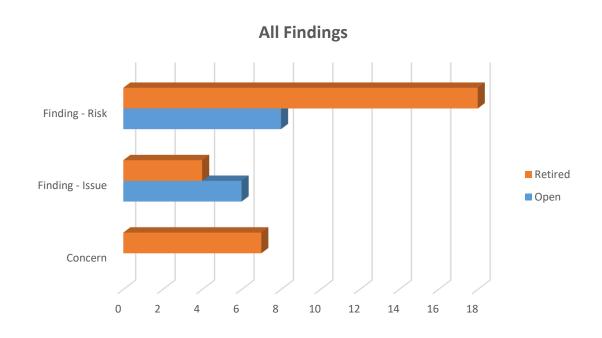

As of the March 2020 reporting period, PCG is tracking 14 open findings (8 risks and 6 issues) and has retired 29 findings and concerns. Of the 14 open findings, 8 are related to Project Management, 2 are related to Configuration and Development, and 1 each in System Design, Deployment, Requirements Analysis & Management and OCM and Knowledge Transfer. IV&V opened two new findings and closed one finding during the reporting period. The following figures provide a breakdown of our open risks and issues by priority and category.

The following figure provides a breakdown of <u>all</u> IV&V findings (risks, issues, concerns) by status (open, retired).

Findings Opened During the Reporting Period

#	Finding	Category
48	Risk - The CMS Outcomes-Based Certification (OBC) Requirements have not been published by CMS, which may impact the project schedule and funding.	Project Management
47	Risk - The COVID-19 pandemic and the related "stay at home" order could hinder project activities and negatively impact the project schedule and budget.	Project Management

Findings Retired During the Reporting Period

Preliminary Concerns Investigated During the Reporting Period

#	Finding	Category
46	New – Due to the development of prototypes and data models based on systems to be retired (as opposed to design documentation supporting the new solution), the solution may not meet the project requirements, resulting in unplanned rework across the SDLC. IV&V fully supports prototyping as a best practice within the Agile SDLC. However, IV&V's concern surrounds the basis of the prototyping, which is stated to be the systems planned for retirement as opposed to newer technologies and the current BES requirements. The ASI, DHS and IV&V are planning a review meeting in early April to further research this concern.	Configuration and Development

#	Key Findings	Criticality Rating
2	Issue – Late Delivery of project deliverables may result in schedule delays . In the March reporting period, the ASI and DHS continued to work on the BES Optimization contract amendment. Once agreed upon, the ASI is planning to publish an updated schedule.	
	To manage the work currently underway, the ASI published an interim schedule on 3/4/2020 with subsequent updates on 3/18/2020 and 3/25/2020. Based on IV&V's review of the interim schedule, it does not include all work that is currently being performed. Recognizing that the interim schedule may not require the same level of detail that will eventually be included in the overall project schedule, all of the tasks that are currently being, or have been performed should be captured in the interim schedule. The ASI stated the intent of the interim schedule is to manage high-level activities/tasks and is actively using the interim schedule to manage the work.	M

Recommendations	
Add all tasks that have been performed or planned to be performed in the interim schedule.	In process
IV&V will reassess the standing of this finding when the BES Optimization schedule is published by the ASI.	In process

	#	Key Findings	Criticality Rating
2	26	Risk – Due to the lack of detail in the baseline schedule, unanticipated schedule delays may occur. In the March reporting period, the ASI and DHS continued to work on the BES Optimization contract amendment. Once agreed, the ASI is planning to publish an updated schedule. The ASI developed and is using an interim schedule to manage the work currently and planned to be performed until the overall project schedule is published.	M

Recommendations	
Add all tasks that have been performed or planned to be performed in the interim schedule.	In process
 IV&V will reassess the standing of this finding when the updated schedule is published by the ASI. 	In process

#	#	Key Findings	Criticality Rating
2	?7	Risk - The baseline schedule lacks proper resource loading which could result in unanticipated schedule delays. In the March reporting period, the ASI and DHS continued to work on the BES Optimization contract amendment. Once agreed, the ASI is planning to publish an updated schedule. The ASI developed and is using an interim schedule to manage the work currently and planned to be performed until the overall project schedule is published.	M

Recommendations	
Add all tasks that have been performed or planned to be performed in the interim schedule.	In process
IV&V will reassess the standing of this finding when the overall project schedule is published by the ASI.	In process

#	Key Findings	Criticality Rating
29	Issue - Uncertainty and/or a lack of communication around long term architecture decisions could lead to unexpected impacts to the project budget, schedule, system design, and planning decisions. In the March reporting period, DHS continued to work with the ASI to negotiate the terms and scope of the BES contract amendment. Currently, the project is anticipating the possibility of delaying the BES implementation timeframe and reducing the scope (requirements) in order to stay within the current project budget. Until the BES contract amendment is finalized, the full impact to scope, schedule, cost, and resources will not be known.	Н

Recommendations	Progress
 IV&V will reassess the standing of this finding upon complete review of the BES contract amendment and will update the recommendations for this finding as appropriate. 	In process

#	Key Findings	Criticality Rating
42	Risk - Insufficient ASI communication with DHS regarding key (urgent/time sensitive) project information could lead to project delays and disrupt DHS operations. During the 2/26/20 status meeting, the ASI stated their intention to update the Communications Plan. The ASI delayed the delivery of the updated Communication Plan to DHS to address the additional changes necessitated by the COVID-19 pandemic. IV&V will revisit this risk with the ASI and DHS in April but maintains this is a medium risk to the project as of the March reporting period.	M

Recommendations	
 Request ASI enhance processes and planning for project communications and include key project communications to DHS in the project schedule. 	In process
 ASI establish a single communications channel to manage all ASI to DHS communications and ensure regular communication to DHS. 	In process
Update project communications plan with enhanced communication processes.	In process

#	Key Findings	Criticality Rating
44	Issue - The project has not documented key milestones to amend the contract for the BES Optimization, which could result in a lack of clarity regarding current status and work that remains to be accomplished. IV&V reviewed the one-page list of tasks and found it to be sufficient to commence tracking of the process. On 03/20/2020, the ASI submitted its BES Optimization proposal to DHS, negotiations are in progress. IV&V will leave this finding open until the BES Optimization contract amendment is executed.	L

Recommendations	Progress
 Develop a singular document (e.g., a milestone calendar) to track progress and understand the scop needed to be done to complete the BES Optimization contract amendment. 	oe of work In process

Criticality Rating

IV&V Findings and Recommendations

New Risk - The COVID-19 pandemic and the related "stay at home" order could hinder project

activities and negatively impact the project schedule and budget.

Project Management

Key Findings

Lt

	Suggest the project and DHS create a detailed, documented risk mitigation strategy and plan that is reviewed egularly and revised to address the current state of the COVID-19 threat and related impacts over the next 6 to 12 months. The plan should include the possible economic impacts to the state budget directly related to oroject resources.	ı J
lu process	Ramp up efforts to setup, train, and assist stakeholders on remote work devices and tools and make every effort to help them to become highly functional with remote access technology (e.g. MS Teams/Skype).	
Progress	suoijsbnemmoo	Ве
	Significance: DHS stakeholder participation in key activities could be significantly hindered – not only by working remotely but also by shifting the focus on delivering services to beneficiaries. Planned key activities such as design sessions that are facilitated/attended remotely may impact the quality of the sessions. Going forward, most if not all project activities will more than likely be conducted remotely until this crisis passes.	
Н	Observation: On 3/23/2020, the Governor of Hawaii issued a "stay at home, work from home" order that from home/remotely at least until the end of April. Some offices may be closed until that time as well. Unclear if the order will extend beyond that date.	

Update the OCM Plan to include any new activities or updates to planned activities to aid the organization

through this COVID-19 pandemic in the short and long term.

In process

#	Key Findings	Criticality Rating
48	New Risk – The CMS Outcomes-Based Certification Requirements have not been published by CMS, which may impact the project schedule and funding.	
	Observation: CMS has not published the Outcomes-Based Certification (OBC) requirements/process, which allows states to receive 90% FFP for Medicaid functionality of the BES solution.	M
	Significance: If the OBC process and requirements are not published by CMS prior to the State's approval of the functional and technical requirements, the project's ability to receive enhanced Federal funding may be at risk.	
	IV&V will follow-up with DHS and provide an update in the next report.	

Recommendations	Progress
 Continue dialogue with CMS regarding the project's approach to OBC and MITA alignment to ensure all CMS requirements are met by the BES Solution. 	In process

Configuration and Development

	#	Key Findings	Criticality Rating
•	12	Issue – Changes in direction regarding the preferred platform for portal development may impact project schedule and cost. DHS reported the KOLEA Portal RFP was released this month. IV&V is not clear regarding DHS' plan for the BES Portal requirements and will follow-up in April.	M

Recommendations	Progress
 Complete the Change Request (CR) process to obtain a Rough Order of Magnitude (ROM) estimate and/or impact analysis as appropriate. 	Closed
 Continue discussions with the ASI and DHS to understand the go forward plan related to the BES Portal requirements. 	In process

Configuration and Development

#	Key Findings	Criticality Rating
16	Issue – Lack of clear understanding of DDI approach may reduce effectiveness of JARs and JADs. The ASI conducted a walk-through of the LucidChart Process Diagrams for DHS however, DHS has stated that this and other ASI efforts to explain the big picture have not met their expectations or increased their understanding of the ASI SDLC methods. Additionally, the project continues to work on the BES contract amendment. It is currently unknown if the BES contract amendment, or the inclusion of subcontractor development resources will change or impact the ASI's DDI approach. IV&V will continue to evaluate this finding as BES contract amendment details are made available.	M

Recommendations	Progress
 IV&V will reassess the standing of this finding upon complete review of the final BES contract ame will update recommendations for this finding as appropriate. 	endment and In process

System Design

#	Key Findings	Criticality Rating
38	Risk – Due to the sequencing of JADs addressing Workflow at the end instead of during current JAD sessions, the project could be faced with significant design rework, which may result in schedule delays, and impact the quality of solution design. The project continues to work with the ASI to negotiate the terms and scope of the BES contract amendment. At this time, the plan for how Workflow will be incorporated into JADs is unknown. IV&V will review plans for the revised BES Optimization effort, specifically as they pertain to JADs, once they become available.	M

Recommendations	Progress
 IV&V will reassess the standing of this finding upon complete review of the final BES contract amend will update recommendations for this finding as appropriate. 	dment and In process

Deployment

#	Key Findings	Criticality Rating
40	Issue - Due to inadequate DD&I Release Management practices the project may experience delayed or failed releases and/or poor release quality. In the March reporting period, IV&V validates that no new M&O or DD&I releases were performed during the month. IV&V will continue to monitor, as it is anticipated that some DDI release changes will be made as the project gets closer to the next BES release.	M

Recommendations	Progress
Assign a Release Manager to manage all details of planned releases.	Complete
 Develop a Release Plan document for each release, that provides details of the planned release and all associated configuration items, clear assignments for all staff involved in all tasks, a schedule for completion of all tasks and activities, planned release status communications, and back out procedures should they be necessary. 	In process

Requirements Analysis & Management

#	Key Findings	Criticality Rating
41	Risk - Due to a lack of clarity regarding "Partially Met" requirements in design artifacts, full traceability of requirements may be hampered, and all requirements may not be fully met. The ASI is continuing its efforts with DHS BESSD to break down the requirements into singular, traceable, and testable requirements to eliminate all partially met requirements. Per the latest interim schedule, this activity was scheduled for completion by March 31, 2020, however it was not completed at the end of the month. IV&V will continue to monitor and provide an update in April.	M

Recommendations				
•	Determine a requirements management and design artifact that provides full accountability of where every component of a requirement that is listed as 'Partially Met' is satisfied, ensuring that each requirement is Fully Met and can be validated as such.	In process		

Progress

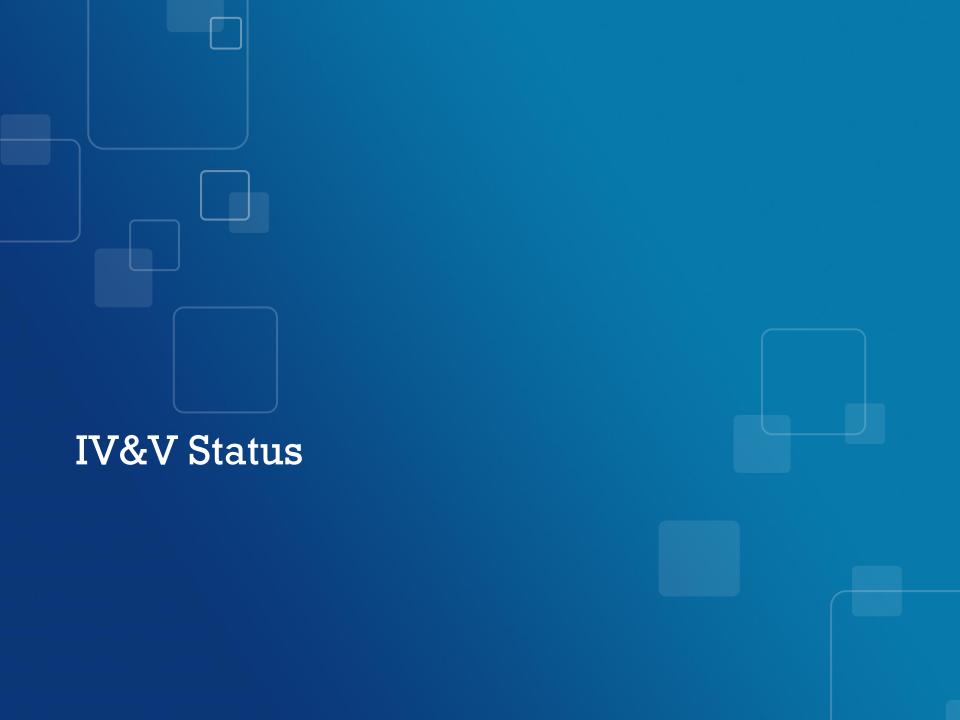

IV&V Findings and Recommendations

OCM & Knowledge Transfer

Recommendations

	$1\sqrt{8}\sqrt{\text{will continue}}$ to monitor this risk until all positions are filled.	
1	Risk - Due to key DHS, BES and ASI Project Team members departing and/or transitioning from the project, succession planning and knowledge transfer is needed to ensure there are no gaps in that DHS has a transition plan in place and is managing the activities. The ASI filled the project coordinator and business analyst positions and is actively recruiting for the Solution Architect position.	43
Criticality Rating	Key Findings	#

lu brocess	 The ASI should develop a transition plan for each key resource as required by the RFP (reference RFP section 3.5.1.2 'Benefits Eligibility Solution Project Staffing'.)
ln process	 The state should develop a transition plan for the project and PMO resources as identified in the RFP, which includes DHS PMO and DHS DDI resources (reference RFP section 3.4.3 'DHS Staffing'). It should also include possible project resource impacts considering the COVID-19 economic impacts to the State.

- BES Security Meeting (03/25/2020)

Appendix A – IV&V Criticality Ratings

Criticality Rating	Definition
Н	A high rating is assigned if there is a possibility of substantial impact to product quality, scope, cost, or schedule. A major disruption is likely, and the consequences would be unacceptable. A different approach is required. Mitigation strategies should be evaluated and acted upon immediately.
M	A medium rating is assigned if there is a possibility of moderate impact to product quality, scope, cost, or schedule. Some disruption is likely, and a different approach may be required. Mitigation strategies should be evaluated and implemented as soon as feasible.
L	A low rating is assigned if there is a possibility of slight impact to product quality, scope, cost, or schedule. Minimal disruption is likely, and some oversight is most likely needed to ensure that the risk remains low. Mitigation strategies should be considered for implementation when possible.

Appendix D - Background Information

Systems Modernization Project

The DHS Enterprise Program Roadmap includes contracting with three separate vendors with the following high-level scope:

- ESI or Platform Vendor responsible for the shared technology and services required for multiple Application vendors to implement and support functionality that leverages the DHS Enterprise Platform.
- ASI or ASI Vendor responsible for the DDI of the Benefits Eligibility Solution (BES Project) enhancing the currently implemented Medicaid E&E Solution (KOLEA) and providing support for the combined Solutions.
- CCWIS Vendor responsible for the DDI of the CCWIS Solution to meet the needs of child welfare services and adult protective services (CCWIS Project) and providing support for the Solution.

Systems Modernization IV&V Project

IV&V performs objective assessments of the design, development/configuration and implementation (DDI) of DHS' System Modernization Projects. DHS has identified three high-risk areas where IV&V services are required:

- Transition of M&O from DHS' incumbent vendor to the ESI and ASI vendors
- BES DDI
- CCMIS DDI

On the BES DDI Project, IV&V is responsible for:

- Evaluating efforts performed by the Project (processes, methods, activities) for consistency with federal requirements
- DHS to ensure alignment with project requirements
- Anticipating project risks, monitoring project issues and risks, and recommending potential risk mitigation strategies

Appendix D – Background Information

What is Independent Verification and Validation (IV&V)?

- Oversight by an independent third party that assesses the project against industry standards to provide an unbiased view to stakeholders
- The goal of IV&V is to help the State get the solution they want based on requirements and have it built according to best practices
- ullet IV&V helps improve design visibility and traceability and identifies (potential) problems early
- IV&V objectively identifies risks and communicates to project leadership for risk management

PCG's Eclipse IV&V® Technical Assessment Methodology

- Consists of a 4-part process made up of the following areas:
- 1. Discovery Discovery consists of reviewing documentation, work products and deliverables, interviewing project team members, and determining applicable standards, best practices and tools.
- 2. Research and Analysis Research and analysis is conducted in order to form an objective opinion.
- 3. Clarification Clarification from project team members is sought to ensure agreement and concurrence of facts between the State, the Vendor, and PCG.
- 4. Delivery of Findings Findings, observations, and risk assessments are documented in this monthly report and the accompanying Findings and Recommendations log. These documents are then shared with project leadership on both the State and Vendor side for them to consider and take appropriate action on.

IV&V Assessment Categories for the BES Project

- Project Management
- Requirements Analysis & Management
- System Design
 OCM and Knowledge Transfer
- Configuration and Development
- Integration and Interface Management
