DAVID Y. IGE GOVERNOR

DOUGLAS MURDOCK CHIEF INFORMATION OFFICER

OFFICE OF ENTERPRISE TECHNOLOGY SERVICES P.O. BOX 119, HONOLULU, HAWAI'I 96810-0119

P.O. BOX 119, HONOLULU, HAWAI'I 96810-0119 Ph: (808) 586-6000 | Fax: (808) 586-1922 ETS.HAWAII.GOV

November 17, 2022

The Honorable Ronald D. Kouchi President of the Senate and Members of the Senate Thirty-First State Legislature State Capitol, Room 409 Honolulu, Hawai'i 96813 The Honorable Scott K. Saiki Speaker and Members of the House of Representatives Thirty-First State Legislature State Capitol, Room 431 Honolulu, Hawai'i 96813

Aloha Senate President Kouchi, Speaker Saiki, and Members of the Legislature:

Pursuant to HRS section 27-43.6, which requires the Chief Information Officer to submit applicable independent verification and validation (IV&V) reports to the Legislature within ten days of receiving the report, please find attached the report the Office of Enterprise Technology Services received for the State of Hawai'i, Department of Health, BHA Integrated Case Management System Project.

In accordance with HRS section 93-16, this report may be viewed electronically at <u>http://ets.hawaii.gov</u> (see "Reports").

Sincerely,

Douglas Murdock Chief Information Officer State of Hawai'i

Hawaii BHA Integrated Case Management System Project – Phase 3

Final IV&V Report for the period of

October 1 – October 31, 2022

Final submitted: November 11, 2022

Solutions that Matter

Agenda

Executive Summary IV&V Findings & Recommendations

Appendices

- A Rating Scales
- B Inputs
- C Project Trends

Executive Summary

The planned R3.27 production deployment for mid-October has been delayed to November due to technical issues with performing the Full Solution Upgrade (FSU). The Project Team has been working closely with Microsoft to address these issues which is expected to be resolved prior to the planned November release.

As a result of the R3.27 deployment issues, 'big boulder' functionality schedules continue to slip and the R3.28 scope has been reduced in order to align to the release deployment schedule.

The IAPDU to extend the DDI period was submitted but not approved in October as planned. Consequently, IV&V has elevated the associated finding from a High Risk to a High Issue as vendors will be working at risk. IV&V will continue to monitor the status of this impactful item.

| Aug | Sep | Oct | Category | IV&V Observations |
|-----|-----|---|-------------------------------------|--|
| R | R | R | Sprint Planning | Current deployment issues have delayed the R3.27 release planned for October impacting future releases. RSM continued to add resources to the project to meet the demands of the current, larger-sized release plans. The criticality rating for this category remains Red (high) for the October reporting period. |
| G | G | G User Story (US) Validation Category which remains Green (low criticality) for the October reporting period. IV&V will continue to monitor the US development and validation process in upcoming reporting periods. | | |
| Y | Y | Y | Test Practice Validation | Progress continues to be made with the Tricentis test automation tool. However, full implementation of the tool that was originally targeted for R3.28 is now expected to be completed with R3.30. This category remains Yellow (medium criticality) for the October reporting period. |
| R | R | R | Release / Deployment Planning | Full Solution Upgrades (FSUs) technical issues have delayed the R3.27 release planned for October. The Project Team expects to have these issues resolved prior to the planned November release. BHA continues to collaborate with Microsoft and RSM on deployment best practices to ensure repeatable solution upgrade deployment activities. IV&V will continue to closely monitor this high-criticality category. |

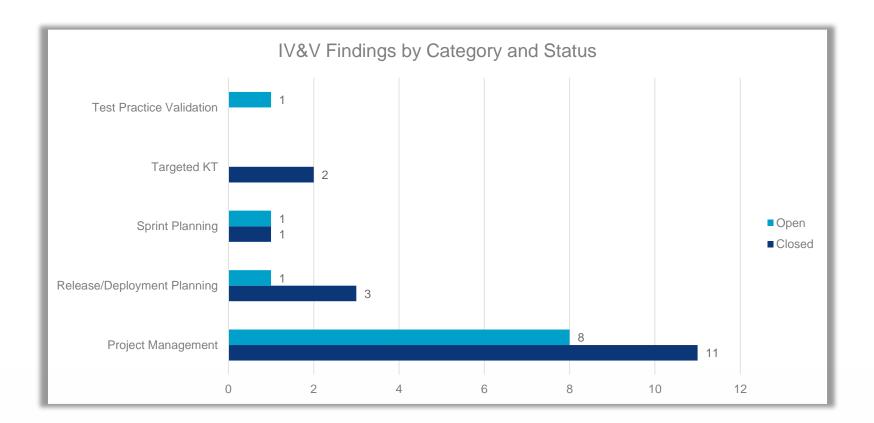

Executive Summary

| Aug | Sep | Oct | Category | IV&V Observations | |
|-----|-----|--|--|--|--|
| G | G | G | OJT and KT Sessions | The criticality rating for the OJT and KT Sessions category remains Green (low) for the October reporting period with no active findings. | |
| G | G | G Targeted KT This category remains Green (low criticality) for the October reporting period. IV&V will continue to monitor. | | This category remains Green (low criticality) for the October reporting period. IV&V will continue to monitor. | |
| G | G | G | Project Performance Metrics | criticality rating for this category a Green (low) and will continue to monitor this category | |
| G | G | G | Organizational Maturity Assessment (OMA) There were no updates to this category. The criticality rating for the OMA category remains Green (low). | | |
| R | R | R | Project Management | Although DHS submitted the INSPIRE IAPDU in October, CMS has asked DOH to resubmit the IAPDU in a newly released template, putting the project at risk. The revised IAPDU will be submitted in November. The associated finding has been elevated to a high issue. As a result of the current FSU deployment issues, the planned R3.28 'big boulder' scope items are at risk for completing on time per the current release schedule. The criticality rating for this category remains red this month. | |

Executive Summary

As of the October 2022 reporting period, there are a total of eleven (10) open findings – five High Issues, four Medium Issues, and one Low Issue spread across the Sprint Planning, Release / Deployment Planning, Test Practice Validation, and Project Management assessment areas.

IV&V Findings & Recommendations

IV&V Findings & Recommendations Assessment Categories

Throughout this project, IV&V verifies and validates activities performed in the following process areas:

- Sprint Planning
- User Story Validation
- Test Practice Validation
- Release / Deployment Planning
- On-the-Job Training (OJT) and Knowledge Transfer (KT) Sessions
- Targeted Knowledge Transfer (KT)
- Project Performance Metrics
- Organizational Maturity Assessment
- Project Management

IV&V Findings & Recommendations Sprint Planning

| # | Key Findings | Criticality Rating |
|-------|--|-----------------------|
| 7 | High Issue - The BHA Technical Team bandwidth may not be adequate to meet the needs of the project, which could compromise project productivity. RSM continued to add resources to the project during October to meet the demands of the current, larger sized release plans. IV&V will continue to monitor this high criticality issue. | 6 |
| | | |
| Recor | nmendations | Status |
| • BH/ | A needs, and should pursue, documentation of the Calculator 3.0 solution. | Completed |
| | Project should investigate mechanisms of increasing the bandwidth of the BHA Technical Team, either by ing resources through new hires, or vendor contracts. | Completed |
| | Project should assess, where possible, if there are responsibilities of the BHA Technical Team that can eassigned to other project staff. | In progress |

• The Project should evaluate where process inefficiencies can be addressed and streamlined to possibly free up the BHA Technical Team's availability.

IV&V Findings & Recommendations Sprint Planning (cont'd)

| Recommendations | Status |
|--|-----------|
| BHA needs, and should pursue, additional Knowledge Transfer sessions on the updated Calculator 3.0 solution. | Completed |
| The Project should consider the formation of a first level resource team to triage/address production defects in a timely manner, without disrupting new development work. | Completed |
| The Project should consider procurement of an online training toolset to support OCM and technical efforts to offset the need for in-person training. | Completed |

IV&V Findings & Recommendations Test Practice Validation

| # | Key Findings | Criticality Rating | |
|-----------------|--|-----------------------|--|
| 2 | Medium Issue – As a result of regression testing not being consistently performed, production releases are breaking and/or deprecating existing functionality in the production environment. There were no releases promoted to production during the month of October and as a result there are no regression testing metrics to report. IV&V will report on updated metrics for the November production release. The Project announced that the automated regression testing using Tricentis will not be used to support R3.28 and will continue to be manually tested. For R3.29 regression testing, the project expects to be 75% automated. Full implementation of the Tricentis tool (90% automation) is expected for R3.30. IV&V will continue to monitor the progress of the Tricentis tool implementation. | M | |
| | | | |
| Recommendations | | | |
| | Pursuing additional formal training in AzureDevOps for test automation at the earliest possible juncture and ommence efforts to automate at least the 2 primary regression test scripts. | | |
| | V recommends DDD and CAMHD develop a common and consistent approach across divisions for ression testing. | Completed | |

• Determine if current regression testing timeframes are adequate and if not, add more time to the preproduction regression test efforts for all release deployments.

IV&V Findings & Recommendations Test Practice Validation (cont'd)

| Recommendations | Status |
|---|-----------|
| Updating the regression test scripts to ensure consistency with system configuration. | Completed |
| Modifying release schedules to allow for regression testing timeframes. | Completed |
| Planning releases by functionality type to avoid unnecessary repetitive work being performed in any given section of the solution. | Completed |
| Performing regression testing after every release, or possibly every other release, or potentially tying regression tests to FSU releases. In addition, consider alternating the DDD and CAMHD scripts every other release. | Completed |
| Modifying regression test scripts to start AFTER case creation, limiting the time it takes to execute. (This recommendation was for a point in time and is no longer valid.) | Completed |
| Implementing 'hard' code freeze dates as well as test environment deployment dates to ensure that testing and deployment activities are not rushed. | Completed |
| Modifying the deployment scripts based on information gained from previous release deployments. | Completed |

IV&V Findings & Recommendations Test Practice Validation (cont'd)

| Recommendations | Status |
|--|-----------|
| Consulting with RSM to determine how the 'interim testing processes' can be improved until such time that automated testing is available for repeatable and complete industry standard regression testing. | Completed |
| IV&V recommends performing an RCA in collaboration with RSM for the continued concerns with regression testing efforts. | Completed |

12

IV&V Findings & Recommendations Release / Deployment Planning

| # | Key Findings | Criticality Rating |
|----|--|-----------------------|
| 18 | High Issue - Due to ongoing deployment processes and technical execution issues, the Project may continue to encounter defects and challenges in meeting projected timelines for production and non-production deployments. R3.27 was planned for production promotion in mid-October but was delayed due to technical issues with performing FSUs. Two attempts were made to promote R3.27 to production, but unfortunately, both took several hours and failed. Initial conversations with Microsoft indicated that the FSU file is too large to promote as a single FSU. However, it was mentioned that Microsoft has made adjustments to address the size issue for the R3.27 upgrade file. The size issue remains a concern for future releases this requires a change in the solution approach for R3.29 forward. Due to the deployment delays, the Project is reducing the scope of the R3.28 release. This will again result in altering targets of the project roadmap, which was updated several times during October alone. The Project is still without a repeatable approach to deployments and continues to work with Microsoft and RSM for guidance. This issue remains at the highest exposure, and IV&V will continue to monitor. | H |

| Recommendations | Status |
|---|-------------|
| Ensure there are adequate and qualified resources to support the current deployment processes. This may require the support from RSM resources to provide assistance and knowledge transfer for some of the more complex deployment components. | In Progress |
| As appropriate, consult with RSM on best practices that BHA could employ to support deployment. | In Progress |

IV&V Findings & Recommendations Release / Deployment Planning (cont'd)

| Recommendations | Status |
|---|-------------|
| Request the assistance of the RSM Solution Architect in reviewing and correcting issues associated with consistency of the configurations across environments, ensuring that the test environment is capable of testing ALL functions of any given release without the need for using multiple test environments. | In Progress |
| Request the assistance of the RSM Solution Architect in review of deployment scripts as a double check for accuracy and completeness prior to commencing deployment activities. | In Progress |
| The Project Team should consider evaluating potential changes to improve/enhance existing processes and communications to address current release/deployment shortfalls. | In Progress |
| IV&V recommends performing an RCA in collaboration with RSM for the continued concerns surrounding environment differences. | In Progress |
| IV&V recommends updating the Project's Configuration Management Plan to address the current needs of the Project. This should include specific checklists geared at ensuring repeatable promotional processes by DOH. | In Progress |
| Look at implementing 'hard' code freeze dates as well as test environment deployment dates to ensure that testing and deployment activities are not rushed. | Completed |
| Ensure an operational and fully functional test environment is available to effectively conduct end-to-end regression testing prior to deploying a release to production. | Completed |
| Work in collaboration with RSM to establish a transition plan for DOH to assume all deployment activities to ensure complete ownership of these processes. This should assist with consistency in approach and execution going forward. | Completed |

IV&V Findings & Recommendations Release / Deployment Planning (cont'd)

| Recommendations | Status |
|---|-----------|
| Develop a plan to institutionalize the execution of "Smoke Testing" for promotions to non-production and production environments. This will help to ensure that all components needed to test have been properly deployed prior to the actual execution of test activities. | Completed |
| Due to an error prone process of 'cherry picking' what is and what is not ready for deployment, IV&V recommends that DOH and RSM collaborate to determine an improved manner for managing DOH environments. (As a result of how the current development environment is being managed, 'cherry picking' components to deploy will continue to occur. This recommendation is closed.) | Closed |

| # | Key Findings | Criticality Rating |
|----|--|-----------------------|
| 14 | Medium Issue - Due to multiple quality concerns, the Project may continue to face impactful system defects. No new releases were promoted to production in October due to failed attempts to promote the R3.27 Full Solution Upgrade. BHA continues to collaborate with Microsoft and RSM to identify how best to promote completed code to production. The lack of success in this area is highly likely to have a ripple effect on upcoming release schedules. IV&V will continue to monitor this finding and its associated effects on the project. | M |

| Recommendations | Status |
|--|-------------|
| • Evaluate existing project staff skills and experience level to ensure they meet BHA support requirements. | In Progress |
| Perform CAMHD revenue neutrality fiscal balance testing on a quarterly basis to ensure revenues are as expected. | In Progress |
| Assign dedicated resources to provide oversight of CAMHD Fiscal Processes. | In Progress |
| Monitor implemented IV&V recommendations for effectiveness. | In Progress |

| Recommendations | |
|---|-----------|
| IV&V recommends performing an RCA in collaboration with RSM after all future release deployments for continual quality improvement. | Completed |
| BHA and RSM to collaborate on the necessary revisions to the submitted design deliverables to increase level of detail and quality. | Completed |
| Perform typical project testing including System Integration, User Acceptance, Performance, and Regression Testing. | Completed |
| • Dedicate sufficient time in between releases for BHA and RSM to execute/implement RCA correction actions to reduce the volume of unplanned rework. | Completed |

| # | Key Findings | Criticality Rating |
|----|---|-----------------------|
| 12 | Medium Issue – PII/PHI data in non-production environments. No substantive changes were observed during October. The Security Assessment is still pending approval by the ASO which is expected in November. RSM is actively working on addressing this issue as part of the scope for R3.28 and R3.29. IV&V will continue to monitor this medium criticality issue. | м |

| Recommendations | Status |
|---|-------------|
| IV&V recommends DOH consider limiting the volume of environments with PII/PHI data and access necessary to support development work, which should help minimize this risk. | Open |
| • IV&V recommends if production data is necessary in any non-production environment that DOH establishes a plan for effectively managing the security of the PII/PHI data, including the potential masking of data. | In Progress |
| IV&V recommends that DOH mitigates this finding by minimizing and/or masking PHI/PII data in designated non-production environments. | In Progress |

| # | Key Findings | Criticality Rating |
|----|--|-----------------------|
| 21 | Medium Issue – Unplanned rework may have an impact on delivering DDI functionality by the end of the DDI period. R3.27 was planned for production promotion in October but was delayed twice due to promotional issues. As such, there are no defect metrics to report during October. IV&V will continue to monitor this medium exposure issue. | M |

| Recommendations | | Status |
|-----------------|---|-------------|
| • | Reduce the amount of unplanned rework by continuing to focus on quality improvement measures. | In Progress |
| • | Strive for defect performance metric not to exceed 20% of all user story points in any given release. | In Progress |

| # | Key Findings | Criticality Rating |
|----|---|-----------------------|
| 22 | High Issue - The project schedules for 'big boulder' functionality development are slipping. The Project re-aligned the release targets for 'big boulder' functionality in late October. The R3.28 scope is being reduced to include just the Customer Portal, Calculator 3.0, CAFAS App Interface, IMHE Power Application, and Golden Records functionality. While available resource numbers are up, these same priority items have been rescheduled for completion for more than half of the calendar year. The Project is at risk in completing the R3.28 scope items as planned due to the current deployment issues. IV&V will continue to monitor this high-exposure project issue. | B |

| Recommendations | |
|---|-------------|
| Extend the current DDI timeframe to allow for the completion of 'big boulder' interfaces functionality development. | In Progress |
| BHA to add more resources to support the development of "big boulder' interfaces functionality. | Completed |

| # | Key Findings | Criticality Rating |
|----|--|-----------------------|
| 25 | Closed Medium Issue - The lack of a formal project governance structure is impeding decision- making procedures and overall leadership cohesiveness. IV&V reviewed the approved BHA – INSPIRE Solution Program Charter sent by BHA in October and has determined this finding can be closed. | M |

| Recommendations | | Status |
|-----------------|---|-----------|
| • | Establish a formal project governance structure to allow CAMHD, DDD, and other divisions to 1) have a single point of accountability, 2) ensure the right projects are approved, 3) outline roles, responsibility and relationships among project stakeholders, 4) provide issue management and resolution, and 5) help with information dissemination and transparent communication. | Completed |

| # | Key Findings | Criticality Rating |
|--|--|-----------------------|
| 26 | Changed from Preliminary Concern to Low Issue - The inability for BHA staff to work remotely is decreasing productivity and causing morale issues amongst team members. Project team members have reported decreased productivity. There is a strong likelihood of the Project losing team members due to their inability to work remotely, as evidenced by a current Help Desk employee retiring and the DDD Product Owner leaving BHA and citing this as one of the reasons. IV&V did not observe any updates for this issue in October. | l |
| | | |
| Recommendations | | Status |
| IV&V recommends that DOH consider granting remote work to help retain existing staff and to attract new candidates for open positions. | | Open |

| # | Key Findings | Criticality Rating |
|------|--|-----------------------|
| 27 | Changed from High Risk to High Issue - The current DDI period expires at the end of October 2022 which will require RSM to transition the D365 solution to the State prior to contract end. A meeting was held in late October to review the submitted IAPDU wherein CMS has requested that BHA transfer the data to a newly released IAPDU template. The continued absence of an approved IAPDU has moved this finding from a risk to a realized issue. It is imperative the IAPDU be resubmitted and approved as soon as possible, as the project is at risk. | 8 |
| | | |
| Reco | ommendations | Status |
| • DI | HS to reconcile current claims invoicing discrepancies. | In Progress |
| • DI | HS to submit IAPDU using the newly released template as soon as possible. | New |

| # | Key Findings | | | | | |
|------|--|-------------|--|--|--|--|
| 28 | High Issue - The DDD Product Owner resigned her position in September and transitioned off the project in early October. The DDD Product Owner Transition Plan listed multiple tasks and activities to be transitioned and most of the tasks has been assigned to existing staff members. A new DDD Project Coordinator role is currently under recruitment. IV&V will continue to monitor this high exposure project issue. | Ð | | | | |
| | | | | | | |
| Reco | ommendations | Status | | | | |
| | &V recommends a formal transition plan be fully defined and executed prior to the DDD Product Owner parture. | Completed | | | | |
| | &V recommends DDD seek (internal/external) multiple staff to replace the DDD Product Owner for each le served. | In Progress | | | | |
| | &V recommends DDD consider soliciting contracted staff to fill the immediate gaps with the DDD Product wner's departure. | In Progress | | | | |

IV&V Findings & Recommendations Project Performance Metrics

| Metric | Description | IV&V Observations | IV&V Updates |
|----------|--|---|--------------|
| Velocity | Review and validate the velocity data as reported by the project Verify the project is on pace to hit the total target number of US/USP for Phase 3 | October - There were no production releases in October to report velocity performance metrics. | N/A |

IV&V Findings & Recommendations Project Performance Metrics (cont'd.)

| Metric | Description | IV&V Observations | IV&V Updates |
|----------------|---|---|--------------|
| Defect Metrics | Understand and track the following: Defects by category (bug fixes) US Points assigned to defects in a release vs US Points assigned to planned US in a release | October – There were no production releases in October to report defect performance metrics. | N/A |

Appendix A: IV&V Rating Scales

Appendix A IV&V Rating Scales

This appendix provides the details of each finding and recommendation identified by IV&V. Project stakeholders are encouraged to review the findings and recommendations log details as needed.

- See Findings and Recommendations Log (provided under separate cover)
- IV&V Assessment Category Rating Definitions

The assessment category is under control and the current scope can be delivered within the current schedule. The assessment category's risks and issues have been identified, and mitigation activities are effective. The overall impact of risk and issues is minimal.

The assessment category is proceeding according to plan (< 30 days late).

The assessment category is under control but also actively addressing resource, schedule or scope challenges that have arisen. There is a clear plan to get back on track.

The assessment category's risk and/or issues have been identified, and further mitigation is required to facilitate forward progress. The known impact of potential risks and known issues are likely to jeopardize the assessment category.

Schedule issues are emerging (> 30 days but < 60 days late).

Project Leadership attention is required to ensure the assessment category is under control.

The assessment category is not under control as there are serious problems with resources, schedule, or scope. A plan to get back on track is needed.

The assessment category's risks and issues pose significant challenges and require immediate mitigation and/or escalation. The project's ability to complete critical tasks and/or meet the project's objectives is compromised and is preventing the project from progressing forward.

Significant schedule issues exist (> 60 days late). Milestone and task completion dates will need to be re-planned. Executive management and/or project sponsorship attention is required to bring the assessment category under control.

Appendix A Finding Criticality Ratings

| Criticality Rating | Definition |
|-----------------------|--|
| 8 | A high rating is assigned if there is a possibility of substantial impact to product quality, scope, cost, or schedule. A major disruption is likely, and the consequences would be unacceptable. A different approach is required. Mitigation strategies should be evaluated and acted upon immediately. |
| М | A medium rating is assigned if there is a possibility of moderate impact to product quality, scope, cost, or schedule. Some disruption is likely, and a different approach may be required. Mitigation strategies should be implemented as soon as feasible. |
| L | A low rating is assigned if there is a possibility of slight impact to product quality, scope, cost, or schedule. Minimal disruption is likely, and some oversight is most likely needed to ensure that the risk remains low. Mitigation strategies should be considered for implementation when possible. |

Appendix B: Inputs

Appendix B Inputs

This appendix identifies the artifacts and activities that serve as the basis for the IV&V observations.

Meetings attended during the October 2022 reporting period:

- 1. Daily Scrum Meetings (selected)
- 2. Twice Weekly RSM Issues Meeting
- 3. Weekly BHA-ITS Project Status Meeting
- 4. Bi-Weekly Check-in: CAMHD
- 5. Bi-Weekly Check-in: DDD
- 6. IV&V Draft IV&V Status Review Meeting with DOH
- IV&V Draft IV&V Status Review Meeting with RSM and DOH

Eclipse IV&V[®] Base Standards and Checklists

Artifacts reviewed during the October 2022 reporting period:

- 1. Daily Scrum Notes (selected)
- 2. Twice Weekly Issues Meeting Notes (selected)
- 3. Reviewed draft Calculator 3.0 document
- 4. Reviewed BHA INSPIRE Solution Program Charter

| 3.00 12/31/ | | an open source JavaScript framework. As this framework is relatively new, the open source support community is small. IV&V's concerns include: - The | reliable help and support, as well as much take a proactive approach to security and identifying any vulnerabilities in the tools. | establish a reliable and repeatable process for keeping abreast of communal updates and support opportunities for a new suite of tools - CompletedIV&V recommends BHA continue to hold targeted KT sessions with RSM on maintaining Calculator 3.0 via a suite of tools, and determine what additional skillsets, training, and/or resources are needed to support BHA's long- term ownership of Calculator 3.0 - Completed | 08/31/2020 - IV&V is unaware of any additional KT gaps being identified by DOH, and as such, is closing this finding.07/31/2020 - The Project resolved the majority of the outstanding Calculator 3.0 defects during July which was implemented in the mid-sprint release on 7/17/2020. The final Calculator 3.0 Knowledge Transfer session was conducted on 7/17/2020. IV&V recommends BHA to identify and communicate any additional KT gaps to RSM during the month of August. If no additional needs are identified, IV&V will close this finding. 06/30/2020 - The project continued to focus attention on the Calculator 3.0 defects during the month of June. RSM conducted another Calculator 3.0 Knowledge Transfer session on 6/26/2020 and scheduled a final session for 7/17/2020. 05/31/2020 - The project continued to focus attention on the Calculator 3.0 user stories and defects during the month of May. RSM conducted another Calculator 3.0 Knowledge Transfer session on 5/29/2020 which IV&V attended. This session included the new C3.0 year-end changes. Additional KT sessions is planned for and IV&V will continue to monitor this project component | Targeted KT | Risk | Low | Closed | Darren Macdonald | RSM has successfully held several KT sessions for this technology and functionality, and DOH staff have stated that it was well received. |

| | delivering DDI Functionality | an impact on delivering | last few releases. | to focus on quality improvement | delayed twice due to promotional issues. As | | | | | | |
| | by the end of the DDI | planned DDI functionality | | measures. | such, there are no defect metrics to report | | | | | | |
| | period. | with only 4 possible DDI | | Strive for defect performance | during October. IV&V will continue to | | | | | | |
| | | releases remaining for | | metric not to exceed 20% of all | monitor this medium exposure issue. | | | | | | |
| | | completion. | | user story points in any given | 09/30/2022 - The defect percentage of USPs | | | | | | |
| | | | | release. | deployed to production climbed again in | | | | | | |
| | | | | | September. R3.26 had an estimated velocity | | | | | | |
| | | | | | of 90 USPs, and 77 USPs were promoted to | | | | | | |
| | | | | | production. Thirty-two percent (32%) of all | | | | | | |
| | | | | | USPs in R3.26 were attributable to defects, | | | | | | |
| | | | | | while 68% of the total USPs were associated | | | | | | |
| | | | | | with planned user stories and requests. This | | | | | | |
| | | | | | September metric falls short of the target of | | | | | | |
| | | | | | no more than 20% of the total USPs | | | | | | |
| | | | | | promoted during the month. IV&V will | | | | | | |
| | | | | | continue to monitor this medium criticality | | | | | | |
| | | | | | finding. | | | | | | |
| | | | | | 08/31/2022 - There were no planned | | | | | | |
| | | | | | releases for the month of August and | | | | | | |
| | | | | | consequently no velocity or defect metrics | | | | | | |
| | | | | | to report this month. IV&V will report out | | | | | | |
| | | | | | these metrics in our September status | | | | | | |
| | | | | | report. | | | | | | |
| | | | | | 07/31/2022 - R3.25 was deployed on | | | | | | |
| | | | | | 07/21/2022 and the associated defect | | | | | | |
| | | | | | percentage significantly improved from | | | | | | |
